

Fit TRACKER, the UK's market-leading Stolen Vehicle Recovery System

Opportunity
to earn up to

£120

TRACKERTM
stolen vehicle recovery

TRACKER and Open GI, working together to earn more from your motor add-on

Open GI has teamed up with TRACKER, providers of market leading stolen vehicle recovery systems to offer your customers a great deal on their Thatcham approved TRACKER Monitor product.

TRACKER Monitor is a small tracking device which is hidden in their cars by a TRACKER approved engineer. Once activated, TRACKER Monitor allows their vehicle to be tracked if it's stolen.

How does TRACKER Monitor work?

» Step 1 – Notify

If a vehicle is stolen without its ignition turned on, TRACKER Monitor will alert TRACKER who will in turn notify you of a possible theft

» Step 2 – Activate

Once you contact the police and confirm to TRACKER that your vehicle has been stolen, TRACKER will activate your unit

» Step 3 – Track

Police cars and helicopters can track the stolen vehicle using their onboard tracking computers, even if the vehicle is hidden in a garage, container or underground car park

» Step 4 – Secure

Once located, TRACKER will send a uniformed guard to wait with your vehicle anywhere in mainland Great Britain (terms and conditions apply)

» Step 5 – Recover

TRACKER will arrange for the recovery company to return your vehicle to you anywhere in mainland Great Britain (terms and conditions apply)

» Tracking in Europe

TRACKER Monitor provides tracking throughout the UK, France, Spain, Poland, Italy, Holland and Luxembourg

TRACKER is the only tracking system operated by all the UK's police forces and has so far, helped the police recover over 21,330 stolen vehicles worth more than £461 million and make over 2,200 arrests.

£288 inc. unit installation and 1 year subscription ex. VAT
